

The Week 7 Software Engineering Project A weekly meeting will be held in **Room 4.36 (Ingkarni Wardli)** at **1:00pm on Wednesday 3th May 2017**.

Agenda

Chair: Zeyu Lin

1 Apologies

- None

2 Present

- Zeyu Lin
- Zeqi Fu
- Minhtam Phan
- Christoph Treude
- Claudia Szabo
- Nickolas Falkner

3 Last week

Last week, we already shown our progress to client which relate to the database and charts demo. And we have already put the real data into database. The database schema include component, event, eventtype, user and usertype 5 tables. In component table, include Id and Name. In event table, include Id, Name, Description, FKComponentId, FKEventTypeId, FKUserId, Grade, StartDate, Version, CourseName, Semester, ShoolYear, and EventTime, Context, Repository, and Prefix. In eventtype table, include Id, Name, Description. In user table, include Id, FKUsertypeId, and FKParentId. In usertype table, include Id, type, Description. And we already import the really data into our data base.

4 Question for this week meeting

- Could you provide us with the data of ID conversion table in order to link students in 2 data sources?
- What do you expect for reports?
- Could you provide us with a list of specific questions to allow us to check whether our schema can answer?
- When do we need to start the questionnaire?
- Suggestion for the architecture, do we really need the MVC structure?
- Do we need provide the selection for user choose the year selection?

5 Dashboard Demo

Before this week meeting, we already connect the charts to our real database.

- Dashboard demo shown on this URL: <http://fuzeqi.ml/dashboard>
- Any changes we should apply to dashboard, especially in UI design?
