## **4 Summary**

### **4.1 SQL tools**

- SQL tools Last Week we discussed the database design, and we present some tables depends on our experience.
- we already set up the MySQL and manage tools
- We also received the student data from our client.

## 5 Feedback

- We need re-design the table based on the data which client gave us and design UML diagram. This UML has to show the relationship between different tables.
- Re-think the relationship based on data character.
- We need think about some critical questions base on data, for example , quickly answer "All the information between 2010 and 2011? ", "When is the peak time for student submit their assignment?".

**Note:-** Next client meeting to be held on 29th March 2017 at Ingkarni Wardli Room 4.21, Time: 3:00pm .
