The Week 6 Software Engineering Project A weekly meeting will be held in **Room 4.36 (Ingkarni Wardli)** at **1:00pm on Wednesday 5th April 2017**.

Agenda

Chair: Zeqi Fu

1   Apologies

- none

2   Present

- Zeyu Lin

- Zeqi Fu

- Minhtam Phan

- Christoph Treude

- Thushari Atapattu

- Nickolas Falkner

3   Last week

Last week, we changed our UML diagram based on last week meeting, and we have done some basic UI model for this project.

4   Question for this meeting

- Do we need to provide the function of login?

- Who will login into the system apart from teachers?

- A teacher can only view the information of the courses he teaches.Is this right?

- Is there an administrator who can view information about all the courses?

- What are the expected functions for administrator?

- Are you interested in teacher behaviors,or only student behaviors.

- Can we have more data(other tables,only table structures, which fields they have)?

- How many years of data you will give us?

5   UI demo

In this week meet, we will show the Basic UI demo based on Web-Service, and will discuss with client some improvement aspect.

- Web-Service post on this temporary URL: http://fuzeqi.ml

- Is it suitable for add login function?

- What kind of data we can use charts shown? (How many data we can fetch)

- Do we need data research function?

- Any technical tools required in this project?
