4 Decisions that were made and issues clarified

- We will record client meeting from this week on.

- It is clarified that students will not be users of the application.Teachers and staff in front office will be the users. We distinguished between the actual users of the application and the current users of the forum.

- Agenda and minutes should be more specific. Agenda should include questions to be discussed on meeting and link to all the documents. All the documents(including agenda, things need to be discussed on meeting) should be sent to clients one day before the client meeting.

- We don't need user's personal information because users are anonymized and all we need to know about user is its id and user type.

- We don't need a teacher-course table and a student-course table. We just need a course_enrolment table:course_id, user_id, grade. We can know the user type from user table. The grade for teacher can be 0 or negative number.

5 Action items for specific people (due date)

- Minh Tam Phan: Schema design and UML for tables(April 4)

- Zeqi Fu: UI design(April 4)

- Zeyu Lin: Schema design(April 4), UI design(April 4)

- All: Think about questions for the application to answer(March 31)

Note: The next meeting will be held in IW 4.36 at 1:00pm-2:00pm on Wednesday 5th April 2017.
