The Week 9 Software Engineering Project A weekly meeting will be held in **Room 4.36 (Ingkarni Wardli)** at **2:00pm on Wednesday 10th May 2017**.

Agenda

Chair: Zeyu Lin

1 Apologies

- None

2 Present

- Zeyu Lin
- Zeqi Fu
- Minhtam Phan
- Christoph Treude
- Nickolas Falkner

3 Last week

Last week, we do serval works on charts and report pages. Based on last week implement of charts page, we can generate the data points by drawing the graph. However, there are some issue in that page. So, last week we have solved following problems. X-axis label issue, we have change some code in order to show all the X-axis label related to the points. We solved parts of the X-axis problem. Also, we provide selection for user, which include Year view, month view, and day view. In different event overview, we provide period time that user can pick it by date-selection. And we also discussed about the report layout, and have general idea on how to implement it. We also provide export csv file function based on what user selected.

4 Question for this week meeting

- A confirmation for the approval of first survey, we need approval from both the ethics and the survey framework?
- What do you think about the report format, any improvement?
- What's the population for the survey? Lecturers across different schools or only the school of computer science? Since other schools do not use Moodle and WebSubmission.

5 Others

Please visit http://fuzeqi.ml/dashboard see the improvement.
